

PETRONET 2

Biopromoter for the remediation and recovery of contaminated soils

Technical Data Sheet

Composition

- Aerobic selected bacterial strains
- Natural yeast.
- Support and nutrients from vegetable origin.
- Macronutrients and trace elements.

Physical properties

- Appearance: powder.
- Humidity: 4-5%.
- pH in solution 7 ± 0.5 .
- Color: Grayish.

Description

Specific biological promoter for bioremediation and recovery of soils contaminated by accumulation of organic molecules (hydrocarbons, oils and fats, etc.) and wastewater.

The macronutrients optimize the biodegradation of pollutants carried out by the indigenous microflora and by the selected Amapex microorganisms. It acts by bioaugmentation and bio stimulation.

Benefits

- Low-cost soil recovery.

How to use

Apply directly on the floor to be treated, in powder or previously dissolved in water. The dose will be defined by Amapex technicians based on the physical-chemical characteristics of the soil to be treated and the concentration of pollutants.

Important information

- Avoid contact with the eyes and prolonged contact with the skin.
- Store in a cool, dry place away from heat sources.
- Do not dispose the container into the environment.
- Keep out of the reach of children.
- Free of GMO (Genetically Modified Organisms).
- The microorganisms of the compound belong to the first-class group according to the council directive 93/88 / EEC of 10/12/1993.
- The bacterial strains used are not included in the list of biological agents classified in Appendix XLVI of Law 81/2008.
- Petronet 2 does not contain any agents that can cause diseases to people, animals or plants.

Packing

- Compostable cardboard container.
- Net weight: 5kg.

Expiration date

- 24 months from the production date.

Application sectors

Petrochemical.
